26 January 2023

Dear John and members of the Worcester Ukulele Club,

Thank you so much for your incredible support of Pancreatic Cancer UK throughout 2022, in memory of Lesley Henley. We are in awe of your unwavering determination to make a difference through music and bringing those around you together to honour Lesley's memory. Congratulations for raising a truly phenomenal £13,775.87 as a club. Your efforts could fund a Nurse for over 10 weeks on our Support Line or over 52 days of innovative research into improving the diagnosis, treatment, and survival of pancreatic cancer. It is today's research that will save lives tomorrow, and I hope knowing you are playing such a crucial part in this vitally important work can bring you an element of comfort, as you remember and celebrate Lesley's life.

Over the years, survival rates have improved enormously for most cancers but sadly, for pancreatic cancer, this is not the case. More than half of people diagnosed die within 3 months - this is unacceptable. Thanks to you, Pancreatic Cancer UK can continue to fund research breakthroughs - our research funding will support the development of a simple test to diagnose pancreatic cancer earlier and ensure people get life-saving treatment faster.

It has been a real privilege to welcome the Worcester Ukulele Club into our community and we have loved supporting you during the past year. As you have mentioned on your Just Giving page, it is these pounds which will make a difference as we demand better for everyone affected by the disease. I hope you know how much we appreciate being a part of this fundraising experience with you.

With your support we can detect early, treat better, and transform care. Thank you so much again.

Abbey & Claudia
Your Community Fundraising Team
